

Stay Open — Set Up Online Ordering Fast!

We're here to help!

e|tab can get your restaurant ready for online ordering in as little as 2-3 hours!

As the world stays indoors, that doesn't mean your business has to stop. In fact, more than ever, your customers are counting on you.

With e|tab, you can offer your customers the same convenience as the big chains without great cost or complicated setup.

Here's what your business could be doing today:

- **Take orders from anywhere (mobile, tablet, any web-based device)**

No matter where you are, e|tab makes placing orders simple. Using any web-enabled device, your customers can simply visit your online ordering site, browse your menu, make their selections and pay for their order.

- **Merchant determines online ordering fee to offset cost**

To offset the monthly software fee, you have the ability to add an online ordering or convenience fee for every incoming order. The amount is up to you—all fees go to your business.

- **Receive orders the way you want (email, text, tablet, receipt printer)**

e|tab gives you the ability to receive your customers' orders that works best with your existing workflow. Choose from tablet-based Order Management, Web-Connected Printing, E-mail Notifications or Text Alerts: or mix-and-match to suit your preference.

- **Change your menu daily**

When the unexpected happens, you need complete flexibility to manage your menu offerings. Our tools make it simple for you to build and manage your menus daily. All you need is a web browser or mobile phone!

- **Get your funds the next day**

Once an order is placed, the funds are on the way and deposited to your account the next business day.

Plus, we offer program pricing with low upfront cost to you.

SOFTWARE FEE

\$49/mon — no setup cost

Keep those orders coming, keep your kitchen busy, keep your staff working.
Keep your restaurant open.

Let e|tab get you started in as little as 2–3 hours for basic setup—
